

One of the benefits with cement tiles is that will become more beautiful with time and therefore is it of importance to maintain the tiles. We recommend to clean the tiles regularly with neutral/colourless soap or Natural Stone & Porcelain aftercare cleaner (which can be purchased through Marrakech Design). We advise against products that contains blech or acids.

Please note; even tiles that is sealed are sensitive to different kinds of acids. Coffee, citrus fruits and vinegar are examples of what can cause stains to the tiles if not cleaned promptly.
